

# LOUISIANA HAZARDOUS SUBSTANCES EMERGENCY EVENTS SURVEILLANCE

## Develop a Plan and Know Who to Call in Case of an Emergency

Develop an emergency response plan before an event occurs. Be familiar with the shipping papers and the Material Safety Data Sheet (MSDS). If a chemical release occurs, immediately notify the Louisiana State Police - Hazardous Materials Hotline, National Response Center and your Local Emergency Planning Committee.

## Re-route Hazardous Substances

To decrease the potential of a release, re-route the transport of hazardous substances away from densely populated areas, especially during peak traffic hours.

## Use PPE

Carry appropriate Personal Protective Equipment (PPE) during the transport of hazardous substances and know when and how to use it.

*What you can  
do to decrease  
and prevent the  
release of  
hazardous  
substances  
during transit*

Center for Environmental Health Services

## Attend Hazardous Materials (HAZMAT) Training

Human error is a leading contributing factor of transportation-related hazardous substance releases. HAZMAT training is not only required, but it is an essential element in reducing HAZMAT incidents through increasing safety awareness. Training must be updated every three years.

## Preventive Maintenance

Equipment failure is often linked to transportation-related hazardous substance releases. Preventive maintenance could prevent or reduce the number of events.

This public document was printed at a total cost of \$1,950.00. In this printing, 8500 copies were produced. This document was produced by Department of Health and Hospitals/Bureau of Media & Communications, P.O. Box 3234, Baton Rouge, LA 70821-3234. This publication is supported by funds from the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) trust fund and the Office of Terrorism Preparedness and Emergency Response of the Centers for Disease Control and Prevention (CDC), provided to DHH under a cooperative agreement by the Agency for Toxic Substances and Disease Registry, Public Health Service, U.S. Department of Health and Human Services. Its contents are solely the responsibility of the authors and do not necessarily represent the official views of ATSDR. It was printed in accordance with standards for printing by State Agencies established pursuant to R.S. 43:31.

# CHEMICAL RELEASE CONTACTS

## Louisiana State Police (LSP), Hazardous Materials Hotline

LSP is the state point-of-contact for reporting hazardous material releases, accidents & complaints.

Immediate reporting is required.

Call 225-925-6595 or 1-877-925-6595,  
or visit [www.lsp.org/rtk.html](http://www.lsp.org/rtk.html)

LSP also notifies the Louisiana Department of Environmental Quality.

## National Response Center (NRC)

The NRC is the federal point-of-contact for reporting all chemical releases. Reporting to the NRC is required whenever reportable quantities of hazardous substances are spilled or released into the environment.

Call 1-800-424-8802 or 202-267-2675,

or visit [www.nrc.uscg.mil](http://www.nrc.uscg.mil)

Visit the Louisiana HSEES web site at:  
[http://www.oph.dhh.louisiana.gov/  
environmentalepidemiology/hseess/  
index.html](http://www.oph.dhh.louisiana.gov/environmentalepidemiology/hseess/index.html)

# ADDITIONAL RESOURCES

## Louisiana Department of Environmental Quality (LDEQ)

LDEQ receives notification of hazardous substance releases, accidents & complaints that occur in Louisiana. Call 225-342-1234, or visit [http://www.deq.louisiana.gov/surveillance/spoc\\_procedures.htm](http://www.deq.louisiana.gov/surveillance/spoc_procedures.htm)

## Local Emergency Planning Committee (LEPC)

LEPCs provide a forum for emergency management agencies, responders, industry and the public to work together to understand chemical hazards in the community, develop emergency plans in case of an accidental release and look for ways to prevent chemical accidents. For contact information visit <http://www.epa.gov/ceppo/leplist.htm>

## U.S. Department of Transportation's Office of Hazardous Materials Safety (OHM)

OHM coordinates a national safety program for the transportation of hazardous materials by air, rail, highway and water. They provide information on shipping, labeling and placarding for vehicles with hazardous material shipments. Call 1-800-467-4922, or visit <http://hazmat.dot.gov>

## Louisiana Hazardous Substances Emergency Events Surveillance (LA HSEES)

LA HSEES collects and analyzes information about hazardous substances released in Louisiana. To obtain copies of reports produced by LA HSEES call 504-219-4586 or 1-888-293-7020, or visit [http://www.oph.dhh.louisiana.gov/environmentalepidemiology/  
hseess/index.html](http://www.oph.dhh.louisiana.gov/environmentalepidemiology/hseess/index.html)
